

System Control Panel

Designed for MS and RS Inverter/Chargers

Use the System Control Panel for quick and comprehensive control of MS and RS Inverter/Chargers.

The System Control Panel (SCP) features a graphical, backlit LCD screen that displays system configuration and diagnostic information in one central location. Large keypad buttons, an intuitive onscreen menu system, and plain text status messages make it easy to configure and operate. By providing basic controls for other devices connected to the network, the SCP reduces the complexity of separate control panels for each device.

The SCP is Xanbus Enabled and easily connects to MS and RS Inverter/Chargers and other devices with off-the-shelf network cables, making installation quick and easy. Built-in flash memory makes the SCP's software upgradeable to take advantage of new features and system enhancements.

Product Features

- ▶ Compatible with MS and RS Inverter/Chargers
- ▶ Graphical 128x64 pixel LCD display
- ▶ Large, tactile keys
- ▶ Meets UL458 Marine and RV standards
- ▶ Control and display of multiple networked devices
- ▶ Xanbus Enabled
